## ROOMS ❖ BY THE SEA

The family room in this Highland Beach residence overlooks the beach, so the designer used colors and shapes that are reflective of the ocean. The sand-colored marble floors and stacked stone walls are offset with a custom carpet featuring abstract sand dollars and a glass wall sculpture that resembles a colorful collection of jellyfish in motion. The back of the blue leather sofa can be adjusted on a reversible track, so the homeowners and their guests can look out at the ocean, or watch television from the custom wall unit on the opposite end of the room. *Integrative Designs Inc., Boca Raton (561-391-7077, [designsbyidi.com](http://designsbyidi.com))*
